So now your printed check can be used the same way as a pre-printed check Transactions are recorded the same way you would with a physical checkbook, in a registry which keeps a record of all checks, and calculate your balance automatically.. Like a real records booklet, you will also be able to enter deposits and other transactions from your statement, such as direct deposits, ATM withdrawal, debit cards and other items, to keep current.. Simply enter the name of the payee (made order to), the numeric amount, and voila! The word amount is automatically generated.. Personal Checks Click on the check type icon last in the middle that says 'Standard'.. Most interaction with the program is done right on the opening screen, pretty much the same way you would proceed with a paper checkbook :The Letter area Under the check is a word processor to print the accompanying letter together with the check.
